## PROFILE SUMMARY

Entry-level Cybersecurity Analyst with hands-on experience in SIEM monitoring, log analysis, and secure application behavior. Background in deploying and securing production mobile applications using Firebase and cloud-based services. Actively seeking SOC Analyst roles with a focus on monitoring, detection, and incident response.

## WORK EXPERIENCE

G-food Delivery Pvt Ltd — Mobile Application Developer & Security Analyst  
Jun 2025 – Present

- Monitored application logs and backend events to detect anomalies and misconfigurations.
- Implemented role-based access control and least-privilege Firestore security rules.
- Applied secure coding practices and input validation to reduce attack surface.
- Managed production releases and ensured compliance with Google Play security policies.

## KEY PROJECTS

G-food Delivery Ecosystem (Production)

- Security hardening and deployment of a multi-role food delivery platform.

## Euro-Weather Forecast Web App

- Built a weather application using JavaScript and REST APIs with secure async handling.
- GitHub: [github.com/ssurekumar01111-hue/euro-weather](https://github.com/ssurekumar01111-hue/euro-weather)
